Education

B. Tech - Information Technology
Saveetha School of Engineering
Current CGPA: 9.47

SKILLS

Programming Languages:
Python, JavaScript

Frontend: React, HTML, CSS,
Responsive UI

Backend: Node.js, Express Flask,

AI/ML: Machine Learning
Integration, Recommendation
Systems

Security: JWT Authentication,
Role-Based Access Control

Database System: SQL, SQL.js

Tools: Git, GitHub, Vercel

Productivity: MS Word Excel,
PowerPoint, Power BI

Core CS: Data Structures

Objective

Passionate Information Technology student specializing in full stack development and AI-integrated web applications. Experienced in building scalable systems using React, Node.js, and machine learning integration. Seeking opportunities to develop impactful software solutions and contribute to innovative technology projects.

RESEARCH & PUBLICATIONS

- Submitted 2 papers to Star Summit focusing on comparisons of different ML algorithms.

PROJECTS

- Burnout Guardian – AI-powered burnout prediction platform built using React, Node.js, JWT authentication, and machine learning integration.
- Cipher Proxy – Secure Search Intelligence Platform
- NRI Students Teaching Platform
- Quantum Web Simulator
- Improving the Accuracy of Movie Recommendations Using Collaborative Filtering (CF) Compared with Content-Based Filtering (CBF)
- Analyzing the Performance of Collaborative Filtering (CF) in Movie Recommendations with Matrix Factorization (MF)

HACKATHONS

- Participated in 4 hackathons, collaborating with teams to build innovative software solutions under time-constrained environments.
- Achieved Top 10 position in one hackathon competition, demonstrating strong problem-solving and development skills.

EXTRA-CURRICULAR ACTIVITIES

- Active volunteer in tech fests and hackathons
- Chess enthusiast with strong interest in strategic thinking
